I'm assuming that next week is pushing it based on our past conversations.

See the following email from Adrian Ruger in State Purchasing regarding the Saturday Night project. Weather-wise, it looks like next week would be a good time for them to do the work.

Hi Adrian,

I have spoken with you a few times in the past year and a half regarding the purchasing/contracting process. Lynn Kunzler told me that he has spoken with you recently about what is needed on our end to enable a mine reclamation project for the Minerals program (not AMR) of the Division of Oil, Gas & Mining. Lynn asked me to email you the two attached bids for the reclamation project, and to do what is needed on our end to help get a contract ready.

Lynn would like to have the contractor start work next week, if possible, so that the work can be done before heavy winter sets in. I heard your message stating that you are out of the office until Dec 3rd. When you get this, can you give me a call or email me to let me know what I need to do on our end, and what our options are time-wise? Thanks.

Peter
